

Glass Coverslips

Models in borosilicate glass - thickness N°1 : 0,13 to 0,17 mm

- > Colourless, very low iron content
- > Refractive index suitable for microscopy

Slides

- > Glass slides, degreased, washed, polished, ready to use
- > Dimensions : 26 x 76 mm
- > Thickness : 1 mm
- > In ordinary glass or extra white glass which improves transparency and microscope viewing
- > Packed in boxes of 50
- > ISO 8037/1 Certified

Economy Slides- Standard, washed, ready-to-use Slides.

Microscope slides, large packaging

Standar quality

Quality silver

- > Particularly recommended for analysis of blood, urine, tissue samples and other biological fluids, in vitro diagnostics
- > Dim. : 26 x 76 x 1-1.2 mm
- > Thickness : 1,1 ± 0,1 mm
- > Clear glass
- > Standard quality: with paper between the different slides
- > Silver quality: no paper between the slides
