## Pipet-Aid® Hood Mate™

*Especially for hoods.*

Practical, without the need for recharging, the Pipet-Aid Hood Mate never leaves its workstation under the hood.

- Extremely light
- Precise, proportional control to the press of a button
- Dedicated external pump, designed to be mounted in the hood
- Without battery, the pump is connected directly to the mains
- Special culture nosepiece with filter (identical to the portable Pipet-Aid)

## Pipet-Aid® with external pump

Mains connected threaded pipette with external pump and/or external double filter, total guarantee against contamination.

- Dual filter removes 100% of particles and drops larger than 0.1 µm, preventing engine contamination
- Protection against liquid backflow in the handle (valve)
- Fully autoclavable handle (motor is external)
