

Varipette® Eppendorf

Pipette for large volumes from 1 to 10 ml
Positive displacement micropipette for volumes up to 10 ml. Well suited for viscous liquids and high vapour pressure. The Varipette® accepts two types of dispensing syringes:

- the Varitip P syringe for aspirating volumes of 1 to 10 ml into short containers;
- the Varitip S, consisting of a short syringe and a long Maxitip tip of 10 ml (to be ordered separately), is used to aspirate liquids from the bottom of deep vials or tubes. A special valve can also be added to prevent droplets from forming on the tip with liquids with high vapour pressure.

Cat. No.	Description	Units/box	€ Excl. VAT/box
033067	Varipette 10 ml 4720	1	NC -
033068	Syringes Varitip P	100	NC -
