

Silicone Caps for aerobic culture

- Alternative to single-use cellulose caps
- Reusable, easily sterilised in autoclave or with a hot air gun
- Usable for about 10,000 hours; withstands about 3,000 autoclaves
- Porous structure on the gooseneck principle
- Air permeability equivalent to cellulose wadding
- No influence on PH
- Can be used in dry air up to 200 °C
- No growth of micro-organisms on or in the cap
- Excellent chemical and thermal resistance

Silicosen silicon caps types T, L and S
