Sampling accessories

Visio+ transparent needles

Needles with an optical window to visualise venous blood return.

- Better optimisation of sampling
- More comfort for the sampler
- Perfect for sampling training
- Avoids the need to systematically transplant difficult veins

Safety caps for vacuum tubes

The caps Cat. No. 080165 (ø 13 mm) and 080166 (ø 16 mm) have been developed to re-seal tubes under vacuum after analysis. They ensure triple safety: no risk of contamination, no aerosol effect (unlike traditional caps), easy opening.

Diameter 13 mm
