

ABgene® 384-well PCR Plate, universal skirted

- One cut corner only on the top right
- This modified design allows it to fit perfectly into the ABI3730 sequencer
- Compatible with all 384 block thermal cyclers and 384 sequencers
- Available in white for quantitative PCR
- Made of virgin polypropylene

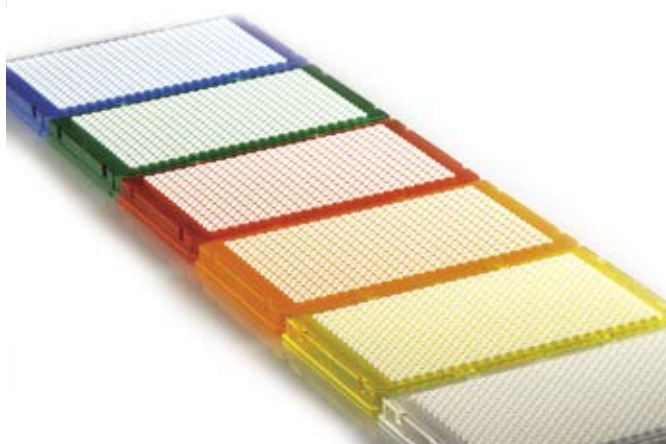

Colour	Natural	Blue	Green	Violet	Yellow	Red	The	€ Excl. VAT.	White	The	€ Excl. VAT.

ABgene® Armadillo High performance PCR Plates

PCR plates combining the rigidity of the polycarbonate frame with the thinness of the polypropylene wells.

- For better performance without the plate buckling
- Improved holding with greater plate stability in post PCR
- Optimised well shape for maximum sample recovery
- Flat alpha numeric marking and raised collar
- Thin walls for better heat transfer
- Two formats: 96 or 384 well
- With or without barcode 128 or customised barcode (consult us)
- Also available as white wells for qPCR
