

Eppendorf twin.tec® PCR Microplate

PCR plates with virgin polypropylene wells, polycarbonate holder and skirt. The rigidity of polycarbonate makes it easier for robots to handle the plates. Cut panel and alphanumeric reference grid.

- **Twin.tec PCR 96 and 384-well plates**
 - Strong, rigid and torsion-resistant polycarbonate frame
 - Fine polypropylene wells for optimal heat transfer
 - OptiTrack® Matrix : Contrasting edges with alphanumeric marking
 - Reaction volume : 150 µl (low profile) or 250 µl
 - Raised well edges
 - Available in a version that can be divided into 4 segments of 24 wells each
 - Available with white wells for real-time PCR
- **Twin.tec microbiology 96 and 384-well plates**
 - Sterile, individually blister-packed, free of bacterial DNA
 - 96 or 384 wells, with skirt or semi-skirt
- **Twin.tec real-time 96 and 384 well PCR plates**
 - White wells for better reflection
 - Significantly increased signal to noise ratio
