

Reagent reservoirs

- In transparent PVC or white polystyrene
- V-shaped bottom
- Thick walls and wide base for safe handling of the product (reduces the risk of spillage)
- Designed to lie flat on the bench and not distort
- Sterile versions: packed in sealed bags and sterilised by electron beam (also free of DNase, RNase, and pyrogens)
- Stackable
- Graduations on the upper edge and the inner wall
- Spout on the 4 corners to easily pour the contents of the reservoir
- Dual reservoir design 25 ml (10 ml + 15 ml) available

Single-use reagent reservoirs

New reservoir concept. Supplied flat: to be folded in V-shape. 5-pack.

- Two volumes: 30 or 40 ml
- Polypropylene, sterile or non-sterile
- For 8, 12 or 16 channel pipettes
- V-bottom for easy recovery of all liquid
