

Films for cell and microbial cultures

ClearLine

ClearLine® AeraSeal™ Porous film

- ▶ Porous hydrophobic adhesive film with a total thickness of 140 µm
- ▶ Promotes uniform gas exchange in all wells
- ▶ Non-cytotoxic
- ▶ Highly gas permeable
- ▶ Easily pierced with a pipette tip for sample recovery
- ▶ Can be used from -20 °C to +80 °C

| Cat. No. | Description | Units/ carton | € Excl. VAT/ carton |

| 765247 | AeraSeal™ film roll, non sterile, 81 mm x 100 m | - | NC - |

4titude

Air-O-Seal 4titude Film

- ▶ Hydrophobic gas permeable adhesive film optimised for cell or bacterial cultures (available sterile)
- ▶ Pierceable, peelable
- ▶ Temperature range: -20 °C to 40 °C
- ▶ Humidity transfer rate : 4200 g/m²/day
- ▶ Porosity : 10 sec/100 cc/in²
- ▶ Dimensions : 135 x 78 mm

| Cat.No | Description | Units/ carton | € Excl. VAT/ carton |

| 044876 | Air-O-Seal adhesive film | 100 | NC - |
| 044877 | Air-O-Seal adhesive film, Sterile | 100 | NC - |

4titude

4Titude Peelable gas permeable adhesive films

- ▶ Sterile, for eukaryotic or bacterial cell cultures
- ▶ Pierceable, peelable
- ▶ Temperature range: -20 °C to 80 °C
- ▶ 3 film formats : 42, 96 or 384 wells / Dimensions : 135 x 80 mm
- ▶ Promotes gas exchange by limiting evaporation
- ▶ Applicator available: Cat. No. 044816, consult us

Breathe Easy and Breathe Easier adhesive films

- ▶ Films allowing the exchange of oxygen, CO₂, and water vapours
- ▶ Non-cytotoxic, sterile, facilitate cell culture
- ▶ With two removable positioning tabs

▶ Breathe - Easy features

- ▶ L x W (cm) : 5.24 x 8.25
- ▶ UV transparent up to 300 nm

▶ Breathe - Easier features

- ▶ Resistant to caustic agents and solvents from -20 °C to +80 °C
- ▶ L x W (cm) : 15.24 x 8.89
- ▶ Easily pierced with a pipette tip
